# uLock

**THE SAFE MIXING SYSTEM**

uLock mixing system is an innovative pail, platform and lid that supports the safe mixing of all powder products.

The uLock pail is a 23 Litre pail that facilitates the secure mixing of various powder products. With its patented locking system, once placed into platform it ensures the stability of the pail during the mixing process.

## BUCKET AND PLATFORM

### FEATURES

- **23 Litre water 36Kg weight capacity**
- 135mm pour spout
- **Flat internal base for complete mixing**
- Metal Handle with soft grip
- **Moulded locking system**
- 435mm (h) X 350mm (c)

### BENEFITS

- **Stops bucket spinning while mixing**
- Mix full bags of adhesives inc water
- **Easy pour spout for levelers**
- Spout fits trowels to remove excess adhesive
- **Recyclable plastic**

## LID

- **Reduces cement, polymers and sand escaping while adding or mixing**
- Vacuum extraction catches fine dust, helping prevent inhalation of fine particles
- **Keeps worksite clean**
- Slips on or off while mixing paddle is inserted

# THE SAFE MIXING SYSTEM

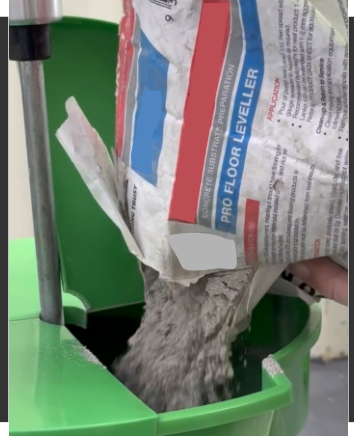

Begin by setting up the platform and inserting your uLock bucket.

Next, add the correct amount of water that the product requires into the pail

Insert your mixer, connect lid then connect your vacuum

Turn vacuum on and add your powder

Turn vacuum off, stand on platform and begin to mix for 1 minute.

Remove lid & continue mixing to a lump free consistency.
