600mm
1.2 kg

900mm
3.2 kg

100% OWNED AND MANUFACTURED IN AUSTRALIA

Did you know that It is illegal to leave an excavation open and uncovered for any length of time, regardless of if the site is secure? The Pier Hole Protector is a cost effective solution, reusable and aligns with WH&S regulations.

This heavy duty engineered excavation cover (available in 600mm or 900mm in diameter) completely secures the top of a freshly dug pier hole until concrete is poured. Eliminating the risk of falls into the pier hole, rubbish, debris entering and the hole filling with water from unexpected weather or other forms of direct water flow.
