Universal Cut - 999 Series

999
 SERIES

- Reinforced concrete/steel
- Extreme speed, extreme long life, lowest cost per cut
- Will cut: Building materials, concrete products, granite and natural stone, iron and steel

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|-------|-----------------|-------------------|---------|------|
| UC230 | 230 | 9 | 22.3 | 10 |
| UC350 | 350 | 14 | 25.4/20 | 10 |
| UC400 | 400 | 16 | 25.4/20 | 5 |

All Material Diamond Blade - 888 Series

888
 SERIES

- Precision cut
- Hole design for high visibility through blade whilst cutting
- Armoured blade core for safety
- Will cut: building materials, concrete products, granite and natural stone

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|--------|-----------------|-------------------|-----------|------|
| 888105 | 105 | 4 | 20/16 | 10 |
| 888115 | 115 | 4.5 | 22.3 | 10 |

| 888350 | 350 | 14 | 25.4/20 | 10 |

Cured Concrete - 555 Series

555
 SERIES

- Laser welded
- 12mm segment for long life
- Will cut: cured concrete, reinforced concrete

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|---------|-----------------|-------------------|---------|------|
| LCONC12 | 305 | 12 | 20/16 | 10 |

| LAGC16 | 400 | 16 | 25.4/20 | 5 |

Concrete Block - 444 Series

444
 SERIES

- Laser welded
- 12mm segment for long life
- Will cut: concrete block

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|----------|-----------------|-------------------|---------|------|
| LBLOCK14 | 350 | 14 | 25.4/20 | 10 |
| LBLOCK16 | 400 | 16 | 25.4/20 | 5 |
| LBLOCK20 | 500 | 20 | 25.4/20 | 5 |

Clay Bricks/Pavers - 777 Series

777
 SERIES

- Laser welded
- 12mm segment for long life
- Will cut: clay bricks, pavers

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|---------|-----------------|-------------------|---------|------|
| LCLAY14 | 350 | 14 | 25.4/20 | 10 |

| ST5 | 125 | 5 | 22.3 | 10 |
| ST9 | 230 | 9 | 22.3 | 10 |

Diamond Blade - Gold Series

- The best diamond blade you can buy at this price point
- 10mm segment
- Will cut: cured concrete, reinforced concrete, clay products and general building materials

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|---------|-----------------|-------------------|---------|------|
| GOLD230 | 230 | 9 | 22.3 | 25 |
| GOLD350 | 350 | 14 | 25.4/20 | 10 |

Cup Grinding Wheels - Double Row

- Double Row for longer life and a smoother finish
- Perfect for flat grinding
- For removal of imperfections

| Code | Diameter Metric | Diameter Imperial | Bore mm | Pack |
|-----------|-----------------|-------------------|---------|------|
| GCW100-DR | 105 | 4 | 20/16 | 10 |

| S141 | 350 | 25.4 | 10 |
| S161 | 405 | 25.4 | 10 |

Flap Discs - Mega-Line Blue R828

Features

- Long life, superior performance
- No backing pad required

Applications

- Suitable for use with portable angle grinders and sanders, on stainless steel and carbon steel
- Ideal for grinding and finishing

Marx Cold Galvanising Spray & Silver Galvanising Spray

MXCOLD

- MXCOLD Contains 95% zinc in dry film.
- Excellent adhesion properties
- Excellent touch-up for damaged galvanized surfaces.
- Allows spot welding.
- No chlorinated solvents. Totally lead and chromate free.
- Excellent corrosion resistance through cathodic protection even when the coating is scratched or damaged.
- Good mechanical resistance due to the excellent adhesion on metal.
- Can be over painted by most commonly used finishes.

MXSILVER

Ideal for re-galvanising & repairing damaged spots on galvanised parts. Suitable as a top coat for Marx Coldgal. It offers corrosion protection, fast drying, as well as an ideal colour match to newly galvanised metal.

Filter Wrap Non-Woven Geotextile

Filterwrap non-woven geotextile helps to provide effective drainage for a range of residential and landscaping applications. Filterwrap separates and filters particles of dirt, sand and aggregates to improve drainage in subsoils and behind retaining walls.

Because non-woven geotextiles such as Filterwrap are highly porous, water can pass freely while fine particles are prevented from moving through. This allows Filterwrap to be used where drainage or control of groundwater is an issue.

Often used in a variety of applications:

- Ground water drainage behind retaining walls
- Separation over soft ground in driveway construction and gravel paths
- Separation between soil and drainage aggregates in planter boxes and roof gardens
- Lining of subsoil drain trenches

| Code | Roll Dims | m ² |

Denso Premseal 450

Bitumen impregnated geotextile tape
An external joint sealing system comprising a fast drying bitumen based primer, overwrapped by a tape constructed with a non-rotting synthetic carrier.

The tape is impregnated with an adhesive mastic and backed on one side with a durable laminate. The adhesive mastic is protected with a siliconised release film which is removed during application.

Sealant - Fuller

FulaFlex 550LM PU Low Modulus Sealant

FulaFlex™ 550LM™ is a one component moisture-curing low modulus Class A polyurethane sealant with excellent joint movement capabilities. It cures to form a flexible, durable and weather proof sealant and exhibits excellent adhesion to a wide range of common construction substrates.

Fuller - Tool Box - Original

Tool Box™ Original MS Adhesive & Sealant

Tool Box Original is a high performance multi-purpose adhesive and sealant in one based on MS polymer technology. Tool Box Original cures to form a high strength, permanently flexible waterproof bond adhering to a wide variety of materials. It performs the function of both a high strength adhesive as well as a highly durable joint sealant.

OrbiPlate™

Ramset™ OrbiPlate™ overcomes the major headache that comes with bolted connections, getting the holes to line up! The methods traditionally used to overcome this were time consuming, costly and often structurally inadequate.

- Utilises readily available Reid™ Elephant Foot™ ferrules for steel to concrete connections
- Made from high tensile steel
- Hot Dip Galvanised finishes

Comprises two washers (1x large, 1x small) and supplied with a M16 or M20 class 8.8 bolt

Expanding PU Foam

ICCONS FOAMFLO® Manual Foam is a one-component, CFC-free propellant, self expanding, ready-to-use polyurethane foam which is completely harmless to the ozone layer. ICCONS FoamFlo is typically used for sealing openings in roof construction, sealing window and door frames, sealing pipe penetrations, sound deadening layers, and improving acoustics and thermal properties

Expansion Cork Joint - Type III

Self expanding cork is manufactured to expand according to the ASTM D1752 Type III specification and is manufactured from the bark of the cork oak tree and granulated to be compressed into blocks then cut into sizes to suit your requirements on site.

Cork vs other materials

Selecting the right material to apply to expansion joints is critical to ensure safety and durability in construction. Cork-based solutions, given the natural properties and benefits of this material, guarantee a sustainable, low maintenance and high technical performance response for buildings and large public works.

Its high compressibility and resilience - make it the ideal material to withstand the swelling and shrinking movements of concrete and other rigid construction elements induced by thermal variations or other factors. Very flexible, cork agglomerates have a resilience of almost 90% after compression at 50% of their initial thickness. These values are much higher than those shown by other fill types.

Cork also meets all other technical requirements of expansion or movement joints. It has high durability without loss of features and without maintenance.

It is a resilient material and resistant to water, oils and acids. In addition, cork solutions do not expand out of the joint, even under heavy traffic or high compression.

Advantages

- Expands to fill joint
- Will not extrude under pressure
- Light weight and easy to handle
- Resilient and waterproof
- Supports sealants subject to hydrostatic pressure

Uses

- Water retaining structures
- Water excluding structures
- Roads, bridges and car parks
- Internal or external traffic areas

Bitumen Impregnated Expansion Joint

BIF Mastic is Bitumen Impregnated Fibre Board.

It is considered the best available worldwide. BIF Mastic is tough, light weight and does not bleed. BIF Mastic is simple to install and is available in a variety of pre-cut sizes. With over 70 years of proven performance, it is the highest quality, most cost effective solution for your concrete expansion joint requirements.

Expansion Joint System

Full depth & straight steel backed expansion joint with 10mm P.E. cross linked closed cell foam for thermal expansion needs. Continuous pour product ensures cost savings can be achieved. Formed from high quality galvanised steel for maximum strength and minimal distortion. Patented peg & wedge setup system is quickest on market. Superior load transfer capabilities are achieved through full Connolly range of UDS dowel sleeves (round & square). Systems with friction cut dowels & hot dipped galvanised dowels as per Australian standards.

* Pegs and wedges not included in joint only

Straight Up Contraction Joint

The Connolly Straight Up Contraction Joint is a continuous pour solution for contraction joints in slab on ground applications. The straight profile guarantees that the load is transferred through the dowels only.

Connolly Straight Up Contraction Joints are a roll-formed galvanised steel section to provide a leave-in-place formwork. The profile is fixed in place using the patented peg and wedge system

Biscuit Plate Dowel System

- Available in 6mm and 10mm black, galvanised
- 6mm - Lateral movement capabilities
- 10mm - Both lateral and end expansion capabilities
- High load and minimal deflection tested qualities
- Ability to fix to timber and steel formwork with ease, using supplied fixing nails and screws
- Ideally suited for construction joints
- Large section sizes (150mm x 110mm) creates increased coverage meaning less dowels required per metre

Connolly Dowel Cradles

- Robust design ensures cradles are stable and can withstand the harsh treatment frequently encountered on site
- Ensures accurate horizontal and vertical alignment of dowels during concrete placement
- Dowels supplied welded in place with bond breaker to half of dowel length
- Available for round, square or plate dowels
- Made in standard 3.0m lengths for easy handling and transport
- Standard Connolly dowel cradles are made to suit most common dowel configurations or custom built to suit specific slab designs

| Code | Dowel Shape | Dowel Size-mm | Dowel Finish | Dowel Spacing |

PVC Keyjoint Former

Reusable PVC keyjoint former for timber formwork
 Uses

Ideal for establishing key joints in concrete pavements, particularly in checker-board layouts
 Advantages

- Reusable
- Made from PVC – will not rot or corrode away
- Light weight – easy to handle
- Nailed to timber formwork with regular clouts
- Easy removal from concrete

PVC Keyjoint Formers are available in 2 sizes; the 80 mm size provide a 50 mm key in the concrete and is suitable for concrete pavements up to 150 mm thick; the 112 mm size provide a 72 mm key in the concrete and is suitable for concrete pavements above 150 mm thick

| Code | Size mm | Key mm | Pavement Thickness | Pack |
|----------|------------|--------|--------------------|------|
| KF80PVC | 80 x 3000 | 50 | Up to 150mm | 20 |
| KF112PVC | 112 x 3000 | 72 | Above 150mm | 20 |

Connolly Capping

- Provides an architectural finish to the joint
- Quickly and easily installed
- Provides a slightly beveled edge to the joint to reduce spalling
- Prevents foreign particles entering the joint
- Provides a compression area at the top of the joint where it is most needed
- Resistant to oils and petroleum based products
- UV treated PVC material ensures long life

| Code | Description | Colour |

Connolly Crack Inducer

Formed from high quality galvanised steel for maximum strength and minimal distortion. Available as plain crack inducer or with capping attached.

Capping is tear off top - in black, grey, sandstone, terracotta

- Economical for small pours such as footpaths, entertaining areas and small driveways
- Ideal for joints in stenciled finishes
- Tear off strip to the capping produces a clean true colour to the joint
- Joints can be positioned as the pour proceeds
- Placement in the wet concrete induces a crack to relieve contraction stresses

| Code | Size | Colour | Pack |
|----------------|-----------|--------|------|
| CKJ-CI25-PLAIN | 25mm x 3m | Plain | 10 |
| CKJ-CI25-BLACK | 25mm x 3m | Black | 10 |

| CKJ-CI45-GREY | 45mm x 3m | Grey | 10 |

Rebate Moulds

- No need for expensive saw cutting
- Quick and easy to install
- Job is kept cleaner
- Forms a true square or rectangular rebate
- Parallel sides ensure sealant achieves maximum bond to the concrete
- Horizontal joint bottom gives maximum support to hard fillers
- Application of bond breaker tape ensures elastic sealants flex properly
- Two sizes to suit most sealant types and varying joint specifications
- Rigid PVC material ensures joints are straight
- Accurate calculation of sealant quantity

| Code | Size-mm | Use With |

Connolly Ground Crack Inducer

Induces a controlled crack from the ground up

- Easy installation
- Secures easily to the ground using PC pins to prevent movement during pours
- Lightweight and durable
- Ideally suited for use with Connolly dowel cradles
- Can save money by helping reduce slab cutting depth

| Code | Size | Pack |

PACVOID Void Former

- Water-resistant
- Environmentally friendly
- No scrap collection
- Reduced transport costs
- Can be stacked to achieve greater void depths
- No assembly required

PacVoid Fill presents an innovative solution for supporting suspended ground slabs on reactive soils. By effectively mitigating the upward force caused by ground heave in 'expansive' soils. These environmentally friendly, weather proof void formers not only ensure stability and ingenuity of the structures but also significantly reduces the risks associated with soil movement.

PacVoid is comprised of an inner recycled cardboard core wrapped in an outer membrane (UNICOR®) which is waterproof and UV resistant, making PacVoid Fill extremely strong and durable for Australian conditions 100% recyclable and 100% water-resistant.

| Code | Size-mm | Pallet |

| FRBKT2 | 150 x 210mm U-Clip | 2 Brick | 20 |

Plastic Shims

Designed for levelling and packing objects with a high load mass. Suited for pre-cast concrete panels across construction industries.

This product is available in several colours and thickness.

This design is crafted with premium quality materials and features ribs to prevent slippage. All panel shims are certified and meet current Australian standards

| Code | Size mm | Bag Qty | Colour |
|---------|----------------|---------|--------|
| TP01SHM | 150 x 100 x 1 | 200 | Brown |

MateenBar™ GFRP

ABOUT MATEENBAR™

MATEENBAR™ is a high performance glass-fibre reinforced polymer (GFRP) rebar. It is the proven solution to corrosion, replacing steel rebar for concrete reinforcement.

Mateenbar™ is designed for engineers and government agencies looking to achieve the best economic, performance, and environmental outcomes on their projects.

Harkers Island Bridge
North Carolina, USA

Fibreglass Composites for Stronger Structures

The drive to deliver sustainable and lasting infrastructure has seen engineers increasingly look to glass-fibre reinforced composite products to provide an alternative to traditional materials such as steel and timber.

Tested and Ready for your Project

- High performance at a competitive price point
- Lightweight for easier handling and economic to transport
- Tested and quality assured
- Compliant with engineering standards globally

Applications

Corrosion Free

- Coastal, marine and desert regions
- Underwater structures
- Building foundation
- Marine pre-cast sea walls
- Pipe sleepers
- Bridge decks and approach slabs
- Roads and infrastructure
- Mechanically stabilized earth (MSE) walls

High Chemical Resistance

- Industrial applications
- Sewage treatment plants
- Agricultural facilities
- Industrial facilities

Thermal insulator

- Hospitals
- Airport compass calibration pads
- Power plants and transformer sites
- Aluminum smelters
- Light Rail

Easy to cut

- Tunnels (soft eyes)
- Mining

Non-conductive/Non-magnetic

- Energy efficient building
- Refrigerated warehouses

Advantages of using GFRP Composites

- Design life is 100+ years
- Zero maintenance cost

- Twice the tensile strength of steel

- Exceptional longevity in salt water environments
- Does not rust or leach

- No interference with sensitive equipment

- Non-conductive and electro-magnetically neutral

- 4x lighter than steel

- 15% lower carbon footprint than steel

- Cut on-site using standard cutting tools

- Faster installation, reduced injury risks, and lower transport costs

Mateendowel

Mateendowel™ is a glass fiber-reinforced polymer (GFRP), used in roading and other applications to offer shear reinforcement where corrosion is a concern.

Mateendowel™ Advantages

Mateendowel™ has similar properties to Mateenbar™ and also provides:

- Corrosion-free and high chemical resistance
- The longest life cycle of all dowel types
- High shear strength for load transfer efficiency
- 1/4 the weight of steel dowel, it's faster and safer to handle
- Significant savings over stainless steel dowels
- Low bond strength – no need to grease dowels
- Corrosion-free joining system reducing maintenance costs

Applications

- Roading
- Bridge decks and barrier walls
- Jointed concrete pavements
- Mechanically-stabilized wall panels
- Expansion and contraction joints
- Approach slabs

Cast Concrete Spacers with Embedded Wire

For vertical and horizontal reinforcement

Large contact surface and stable fixing for use on the building site and in the precast plant.

- Available in covers from 20 mm to 100 mm
- Available in Round, Square, and Triple Cover Blocks
- Available with galvanised (stock) or stainless (non-stock) steel tying wire
- Other sizes available upon request
- Compressive strength 60+ MPa
- Conforms to AS/NZS 2425
- Test reports available upon request

Fibre Extruded Spacers

- Available for Horizontal and vertical elements
- Available in various cut widths and covers
- Other sizes available upon request
- Suitable for high load distribution
- Tying wire options available at additional cost
- Compressive strength 60+ MPa
- Conforms to AS/NZS 2425
- Test reports available upon request

Cementitious Grouts - Aitken Freeman

| Code | Description |
|-------------|---|
| AF-TECGC | An economical Class A general purpose non-shrink grout, for dry pack or fluid application |
| AF-TECGFINE | A non-shrink general purpose Class C type cement based grout |
| AF-TECGGP | An economical Class A non-shrink grout, specifically for fluid application or pumping |
| AF-TECGHS | A high strength Class C grout for critical applications. |
| AF-DEEP | Flowable Class C grout for Large Volume or Deep Pours. Gaps from 20mm to 500mm |

Repair Mortars - Aitken Freeman

| Code | Description |
|-----------------|--|
| AF-FC | Fast drying cementitious surfacing compound for vertical surfaces. Available in standard Grey or Off White |
| AF-HB | A polymer modified lightweight mortar for the repair of vertical and overhead defects 10 – 80mm in concrete structures |
| AF-HB50 | A polymer modified lightweight repair mortar for the repair of vertical and overhead defects where a strength of 50MPa is required |
| AF-TPLITE | A fine filled, light weight patching mortar. Ideal for filling precast panel cast-in plate recesses - 10kg |
| AF-PAVEP | A single component premixed cement based flooring screed for use from 10 – 50mm |
| AF-PAVEPD | Fast setting premixed concrete for pavement repairs from 20 – 200mm thick |
| AF-PAVEPF | Fast setting premixed screed for applications from 10 – 50mm in depth |
| AF-RENPRIME-1LT | Acrylic Render Priming Agent - 1lt |
| AF-RENPRIME-5LT | Acrylic Render Priming Agent - 5lt |

Cementitious Repair Mortars - Fosroc

| Code | Description | Used For | 28 Day Strength | Trowel Build/Depth | Primer |
|----------|--|---|-----------------|--------------------------|---|
| FC302001 | FOSROC RENDEROC FC Polymer modified fairing mortar to cover surface imperfections. Designed for application in thin layers to produce a fair-faced appearance to concrete surfaces or masonry surfaces in readiness for a protective coating. | Vertical / Overhead Fairing coat to cover surface imperfections up to 3mm deep in new concrete and blockwork, eg. blow holes, honeycombing and voids | 31.5 Mpa | Up to 3mm | No Priming Required |
| FC302020 | FOSROC RENDEROC HB40 High build repair mortar, suitable for use with embedded galvanic anodes. | Vertical / Overhead Localised patching of reinforced concrete up to 35 MPa | 35 MPa | 10mm to 40mm Vertical | Substrate: Nitobond HAR Reo steel: Nitoprime Zincrich |

Fosroc Concure A99

Concure A99 is water based acrylic curing compound which conforms to AS3799. It is suitable for curing concrete and cement renders where aftertrades such as painting with acrylic paints is likely

| Code | Description | Pack |
|--------------|-------------------|------|
| FC600909-20L | Concure A99 - 20L | 32 |

Fosroc Nitoprime Zincrich

Zinc-rich epoxy resin primer to protect steel reinforcement within repair mortars

| Code | Description | Pack |
|-------------|--------------------------|------|
| FC322100-1L | Nitoprime Zincrich - 1lt | 6 |

Kingspan Air-cell Insulbreak Foil Faced Curing Blankets

Often used as Foil faced curing blanket for concrete slabs.

Kingspan AIR-CELL Insulbreak is a 3-in-1 insulation, vapour barrier and thermal break solution for steel-framed construction.

| Code | Description |
|--------------|---|
| ACF-INSULB70 | Insulbreak 70 7.2mm x 1350mm x 22.25m Roll |
| ACF-INSULB90 | Insulbreak 90 9.2mm x 1350mm x 22.25m Roll |

W.R. Meadows - 1100 Clear Concrete Curing Compound

DESCRIPTION

The 1100-CLEAR series of water-based concrete curing compounds is formulated from hydrocarbon resins which conforms to AS3799.

Once applied, 1100-CLEAR forms a premium-grade membrane that retains an optimum amount of water in freshly placed concrete for complete hydration of the cement.

FEATURES / BENEFITS

- When properly applied, 1100-CLEAR produces a premium grade film, which optimizes water retention.
- Furnished as a ready-to-use, true water-based compound.
- Offers a compressive strength significantly greater than improperly cured or uncured concrete.
- Increases tensile strength for greater resistance to cracking and surface crazing.
- Minimizes excessive shrinkage.
- Can be applied quickly and easily with conventional commercial spray equipment.
- VOC-compliant.

| Code | Litres | Description |
|-------------|--------|------------------------------|
| WRM1100-5 | 18.93 | Clear Curing Compound - Pail |
| WRM1100-IBC | 1041 | Clear Curing Compound - IBC |

Epoxy Repair

| Code | Description |
|----------------|--|
| | Resiloc PM 1.5lt KIT |
| AF-RESILOC | A smooth 2 part epoxy paste for general repairs in pavements, slabs, panels, etc. |
| | Resiloc PM 6lt KIT |
| AF-RESILOC-6LT | A smooth 2 part epoxy paste for general repairs in pavements, slabs, panels, etc. |
| | Resiloc HB 2lt KIT |
| AF-RESILOCHB2 | A high build epoxy mortar for use as a repair mortar for cracked or damaged concrete |

Floor Topping - Cemtop HD30

Durable polymer modified mortar, designed to re-surface rain damaged concrete. Available in fine grade for squeegee application; coarse grade for trowel application & heavy duty remedial work. Internal/External application - Trafficable

| Code | Description |
|-----------------|----------------------------------|
| FC652021-18.6KG | Cemtop HD30 - Fine Grey Powder |
| FC652023-18.6KG | Cemtop HD30 - Coarse Grey Powder |
| FC652022-1.4L | Cemtop HD30 Wet Mix - 1.4L |
| FC605120-1L | Nitoprime 330 - Primer - 1L |
| FC605120-5L | Nitoprime 330 - Primer - 5L |

Patch & Anchor

A fast-setting, non-shrink, polymer-modified cement patching and anchoring compound for concrete, cement render, blockwork, brickwork and masonry surfaces

- Develops very high strengths
- Non-shrink
- High bond strength to masonry surfaces, i.e. concrete, brick, block
- Very low water absorption when set
- Does not contain calcium chloride, therefore will not corrode anchor bolt and reinforcing steel
- Cement colour match

| Code | Description |
|--------|--|
| CCPA20 | Fast setting patching compound - 20kg - Grey |

Crack Repair - ResigROUT LV

- Excellent adhesion
- High strength
- Moisture tolerant - cures under damp conditions
- Ease of application and convenient mix ratio
- Economical cost of material

| Code | Description |
|---------------|--|
| | ResigROUT LV - 300ml KIT |
| AF-RESGLV | ResigROUT LV is a low viscosity epoxy grout for the repair of cracks in concrete pavement. |
| | ResigROUT LV - 1.5LT KIT |
| AF-RESGLV-1.5 | ResigROUT LV is a low viscosity epoxy grout for the repair of cracks in concrete pavement. |

Dis-Crete Concrete Dissolver

This biodegradable, odourless liquid alternative is fume-free and works by breaking down the Portland cement in concrete, transforming hardened material into a soft, easy-to-rinse slurry. Dis-crete efficiently removes cured cement, concrete, mortar, and grout from nearly any surface using only cold water.

| Code | Description | Pack |
|--------------|--------------------------------|------|
| DIS-CRETE500 | DIS-CRETE - 500ml Spray Bottle | 25 |
| DIS-CRETE5L | DIS-CRETE - 5L Bottle | 4 |
| DIS-CRETE20L | DIS-CRETE - 20L | 1/32 |

Patch Pins - Helifix

- Stainless steel helical pin for providing a strong mechanical key when patch repairing reinforced concrete
- Forms powerful bond with patching mortar
- Additional mechanical bonding security
- Can be installed vertically or angled and bent after installation, if required
- Requires no chemicals
- Quick, simple and effective

| Code | Description |
|-----------|--------------------------------------|
| HPP8X70 | Helifix Patch Pin 8 x 70mm - 100pcs |
| HPP8X100 | Helifix Patch Pin 8 x 100mm - 100pcs |
| HPPDSRIVE | Helifix Patch Pin Sleeve Driver |

W.R. Meadows - Duogard Citrus Form Release Agent

DESCRIPTION

DUOGARD CITRUS is a citrus-scented, multi-reactive form release agent. It is composed of an organic chemical that reacts with the alkali content of the concrete to form a release film that effectively prevents the bonding of concrete to the form. In addition, DUOGARD CITRUS also contains a high molecular weight and a nonreactive, chemically inert ingredient to assist in clean and quick form release and removal. These exclusive ingredients combine the effectiveness of a chemically reactive type and an inert barrier type to provide a doubly effective separation ... DUO... and the ultimate in form release.

FEATURES / BENEFITS

- Pleasant citrus scent.
- Contains no diesel fuel.
- Provides a better and cleaner cast when applied on pre-stressed and precast concrete forms.
- Increases wood form life, prevents rust, and rustproofs metal forms.
- Effectively minimizes concrete buildup on pavers, R/M trucks, mixers, spreader finishers, buggies, chutes, and other equipment.
- Breaks concrete bond between surface and form cleanly and effectively ... leaves smooth surface.
- Will not stain or discolor concrete and can be painted over.

| Code | Litres | Description |
|-------------|--------|--------------------------------|
| WRMCITRUS-5 | 18.93 | Citrus Form Release Agent Pail |

Lano-Form

LANOTEC

A ready-to-use, lanolin-based concrete release agent

- Breaks concrete bonds
- Extends the life of timber and metal moulds
- Protects equipment from concrete and paint overspray
- Safe for use on PVC, fibreglass, polypropylene, rubbers and polystyrene

| Code | Litres | Description |
|--------|--------|-----------------------------|
| LF-20L | 20L | Lano-Form RTU Release Agent |

Stormwater Finishing Collar

| Code | Colour | Box |
|--------------|--|-----|
| HOL-SSWF0605 | Finishing Collar - 90/100mm with grate | 25 |
| HOL-SWF0600 | Finishing Collar - 90mm with grate | 25 |

W.R. Meadows - Duogard II Form Release Agent

DESCRIPTION

DUOGARD II form release agent is composed of organic chemicals emulsified in water that react with the alkali content of concrete to form a release film that effectively prevents the bonding of the concrete to the form.

DUOGARD II form release agent can be used on various types of forms (wood and steel, as well as fiberglass, aluminum, and fiber tubes).

FEATURES / BENEFITS

- Produces a better and cleaner cast when applied on pre-stressed and precast concrete forms.
- Cuts stripping time to an absolute minimum.
- Reduces form cleaning and repairing.
- Increases wood form life, prevents rust, rustproofs metal forms.
- Effectively minimizes concrete buildup on pavers, R/M trucks, mixers, spreader-finishers, buggies, chutes, and other equipment.
- Breaks concrete bond between surface and form cleanly and effectively ... leaves smooth surface.
- Will not stain or discolor concrete and can be painted over.
- VOC compliant.

| Code | Litres | Description |
|---------------|--------|-------------------------------------|
| WRMDUOGARD2-5 | 18.93 | Water-Based Form Release Agent Pail |

PVC Waterstops

Full range of PVC waterstops available. Extruded from specially compounded PVC they are designed for use in water retaining and water excluding structures where a positive seal is required for poured in-situ concrete expansion, construction and contraction joints

| Code | Size | Description |

Polo - Road Con Dust Suppressant

Road Con was developed for applications on roads, access tracks, haul roads, and most trafficked areas to reduce water consumption and to control and reduce airborne dust. Road Con captures moisture from the atmosphere in dry climate conditions to control the dust emissions of the road surface. Road Con is a one-time application product and will therefore reduce the equipment required to control dust on roads by reducing the large number of required loads of water on your unsealed road. Road Con has been developed as a non-hazardous material, easy and safe to apply and use. Road Con is a long-term dust suppressant.

- Reduces Airborne Dust Emissions from Trafficked Areas
- Ease of Application into Water Tankers or apply yourself
- Long Term Dust Suppression Solution for various Applications
- Natural Technology Dust Suppression Solution for long term Dust Control
- Reduces frequency of Maintaining Roads, saving Water Consumption, Labour and Equipment Costs
- Magnesium Chloride based Chemistry
- Apply when Completing Normal Road Maintenance; Prepare Surface, Apply Solution, Wheel Roll to Finish

| Code | Description |
|--------------|------------------------------------|
| POLO-ROADCON | 1000 IBC Road Con Dust Suppressant |

Granular Sodium Bentonite Waterstoppage

WATERSTOPPAGE is chemically treated, granular sodium bentonite used as a detailing accessory product for CETCO Waterproofing Systems. When wetted, WATERSTOPPAGE forms into a dense, low permeable material that combines with the sodium bentonite in the waterproofing products to form a seamless waterproofing membrane.

| Code | Description |
|----------------|---|
| WSTOP-SEAMCLAY | Granular sodium bentonite seaming clay - 25kg bag |

Waterstop - Hydrotite

Hydrotite is hydrophilic waterstop which expands in a controlled fashion in the presence of moisture to create a pressure seal within construction joints in concrete structures.

| Code | Description | Pack |
|------------|----------------------|------|
| CJ0725 | 7 x 25mm - 10m Roll | 5 |
| CJ10202K | 10 x 20mm x 10m Roll | 5 |
| LEAKMASTER | LEAKMASTER - 320ML | 12 |

Polo - Dust Bind Dust Suppressant

An acrylic polymer product that forms a crust on material thus stopping that material becoming airborne. Polo Dust Bind can be used in its supplied form or up to 1:100L in water and can be used in a diverse range of applications from long standing stock piles to recently excavated areas that require a product to keep the material at site and not become airborne in high winds. Also, Polo Dust Bind is proven itself to be leaders in crusting the top of open rail wagons so there are no dust emissions in transport and thus removing the need for covered rail wagons.

| Code | Description |
|---------------|--------------------------------|
| POLO-DUSTBIND | 1000 IBC Dust Bind Suppressant |

Waterstop-RX

WATERSTOP-RX® is one of the most efficient and effective waterproofing products available today for preventing water penetration in concrete joints.

For cast-in-place, reinforced concrete structural joints—vertical and horizontal—as well as around pipes and structural penetrations, WATERSTOP-RX® is your most reliable protection against water. Working as an active barrier for structures under either continuous or intermittent hydrostatic pressure, WATERSTOP-RX® substantially reduces the possibility for leaks—its active volcanic bentonite component absorbs up to 15x its volume in water, expanding to seal cracks using the very pressure of the water itself to fill and block any gaps.

| Code | Description | Pack |
|-------------|--|------|
| WSTOP-RX101 | 25 x 20mm x 5m Roll Shape Rectangle | 6 |
| WSTOP-RX102 | 20 x 10mm x 10m Roll Shape Half Round | 6 |

Waterstop-RX

WATERSTOP® XP is an active polymer strip waterstop featuring XP Technology that has been proven effective in a wide range of contaminated environments. The active polymer of WATERSTOP® XP is engineered to provide a consistent positive seal against concrete surfaces in fresh and high-saline ground water conditions. WATERSTOP® XP is effective in both continuous and intermittent hydrostatic conditions.

| Code | Description | Pack |
|-------------|--|------|
| WSTOP-XP | 10 x 15mm x 6m Roll Cross Section Shape Rectangle | 8 |
| CETSEAL-300 | Dual Purpose Moisture Cure Polyether Sealant/Adhesive | 12 |

Prime Exposure - Exposed Aggregate

Prime Exposure is used to expose the aggregate in concrete surfaces. Prime Exposure works by delaying the set of the slurry (fat) on the concrete surface to expose the surface aggregate. Because Prime Exposure is coloured a bright fluorescent green you will be able to easily see and gauge the consistency of surface coverage. Use Prime Exposure for patios, driveways, landscaping and pool surrounds.

It's applications are only limited by your imagination...

| Code | Litres | Coverage | Pack |
|---------|--------|------------------------------------|------|
| PRIME20 | 20 | 80-100m ² per 20 Litres | 1/32 |

Prime FormGel

Prime FormGel is a water soluble thick retardant gel that is applied to vertical and horizontal surfaces to expose the aggregate in concrete.

BENEFITS

Applied prior to pouring concrete, Prime FormGel allows you to leave formwork in place to expose the concrete surface 12 to 48 hours after pouring the concrete. This time frame is weather dependant.

Prime FormGel retards the surface ensuring an even exposure effortlessly with a brush/broom and hose or a high pressure washer. The fluoro green colour ensures easy application and reduces the chances of areas being missed or not coated. Prime FormGel is water soluble and Eco-friendly.

| Code | Litres | Description | Pack |
|-----------|--------|------------------|------|
| FORMGEL10 | 10 | FormGel Retarder | 1/32 |
| FORMGEL | 20 | FormGel Retarder | 1/32 |

Prime - Anti Slip

Prime Anti Slip is a transparent crushed glass, that transforms any sealed concrete surface to a pedestrian friendly anti slip coating.

BENEFITS

Unlike polymer, Prime Anti Slip it doesn't breakdown in UV light. Easy application, impervious to any contaminate and cost effective. Will only darken the coating by up to 5% depending on the application concentration.

| Code | Bag | Description | Pack |
|----------|-----|---------------------|------|
| PRIMESRA | 1kg | Slip Reducing Grain | 12 |

Prime - Evaploc

Tired of getting grief over hairline cracks? Prime Evaploc is a water soluble liquid when sprayed on curing concrete creates a plastic film that retards water evaporation in setting concrete. This greatly reduces the chances of plastic shrinking (known as hairlines) while making the concrete more workable for an extended period.

BENEFITS

Prime Evaploc reduces the chances of plastic shrinkage by up to 80% if the ground surface has been thoroughly watered prior to concrete placement. Using Prime Evaploc will allow the concrete to be workable for a longer period by delaying the surface to crust over in windy and hot conditions. Once applied the concrete surface will have a creamy feel under the trowel making finishing easier without altering the concrete strength or durability. Prime Evaploc retards concrete water evaporation by up to 80% in windy conditions and up to 60% in sunlight. The distinctive fluoro green colour ensures easy and even product application. The bright colour that makes application so easy leaves no staining or residue once cured

| Code | Litres | Description | Pack |
|---------|--------|----------------------|------|

Prime Hill Assist Retarder

Prime Hill Assist Retarder is the equivalent to Prime Retarder but has been formulated with a thicker viscosity to avoid runoffs down gradients and vertical surfaces. Prime Hill Assist Retarder works by delaying the set of the surface cement exposing the aggregate in the concrete.

BENEFITS

The easy to see fluorescent green colour ensures even coverage, reducing missed or non-covered areas. The viscosity of Prime Exposure Hill Assist Retarder has been formulated with a thicker viscosity to avoid runoffs on gradients and vertical surfaces. Improved surface adhesion which will increase its retarding power. Reduced wash off times due to superior performance in warm or windy conditions to that of other retardants on the market. Unsurpassed level of surface exposure, providing an even finish and polish of stone

Prime Standard Sealer

Prime Exposure Acrylic Standard Sealer is made using the finest acrylic polymers and is blended in Australia for Australian conditions.

The Prime Standard Sealer is UV resistant and will protect your concrete from mould, staining, algae, moss and repels dirt, grime and oils.

| Code | Litres | Description | Pack |
|----------|--------|--------------|------|
| PRIMESTD | 20 | Clear Sealer | 1/32 |

Prime One Coat Sealer

Prime Exposure Acrylic Standard Sealer is made using the finest German acrylic polymers and is blended in Australia for Australian conditions.

Prime Exposure One Coat has been specifically designed utilizing various polymers to save time and money whilst delivering the same results as the two coat process. Prime Exposure Acrylic Sealers will enhance the colour in your decorative concrete and keep it looking like new for years. Our sealers are UV resistance and will protect your concrete from Mould, Staining, Algae, Moss and repels Dirt, Grime and Oils.

Prime Exposure - Ultimate Coverage

Prime Exposure's **Ultimate Coverage** is a revolutionary custom designed exposed aggregate concrete sealer. Engineering a cutting-edge formulation specifically designed for exposed aggregate concrete contractors who demand perfection.

Ultimate Coverage exposed aggregate sealer was developed to be easily applied by spray unit or roller. We understand the frustrations of having your exposed aggregate masterpieces potentially stained and damaged by other trades when you have not had the opportunity to seal immediately after completion. Exposed Coat eliminates this problem as you can seal and protect your project as soon as it is dry, saving time and money. Additionally, it boasts improved moisture tolerance when compared to traditional solvent based clear sealers.

Ultimate Coverage can be used on freshly poured exposed aggregate concrete and can be used on both old and new exposed aggregate concrete. **Ultimate Coverage** is UV resistant and will assist to protect your exposed aggregate from dirt, mould, staining, algae, moss, grime, and oils.

Prime Same Day Sealer

Same Day Sealer is a penetrating, breathable primer coating designed for "same day" application on freshly poured concrete. Prime Same Day Sealer is ready to use and can be applied directly to green curing concrete.

It retains a wet/semi-gloss appearance, it also minimises substrate preparation and protects the surface whilst not allowing efflorescence to rise through it.

Our Same Day Sealer requires a second coat of either Prime Standard Sealer or Prime Coloured Sealer as the breathable resin is not as UV resistant or durable.

Prime Aqua - Water Based Sealer

Prime Aqua - Water Based Acrylic Sealer Range

- Saves time and money with being able to seal the same day
 - Superior coverage per square meter and will last 30% longer than traditional xylene based sealer
 - Priming system that will set in 30 minutes and extract surface moisture
 - Easy to apply and is non-hazardous with very low odour, ideal for indoor and outdoor application
 - Improves early surface strength and moisture retention
 - Protects against foreign contaminants while assisting in the curing process
 - Can be applied over xylene based sealers
- Available in 8 colours: Black, Charcoal, Basalt, Grey, Woodlands, Light Grey, Wallaby and Bluestone

Thunderbolt Pro XTB - Hex Head

ICCONS® Thunderbolt®PRO

Hex Head is the latest high tensile screw-in, self tapping concrete and masonry screw anchor for use in a wide range of applications found in the residential, commercial and infrastructure construction spaces. The Thunderbolt®PRO is the most complete screw-bolt range on the market with the entire range AS5216:2021 Compliant, ETA assessments for cracked concrete, fire performance and seismic ratings (please see technical data for specification requirements).

Egcodorn® transverse force dowel

By using the Egcodorn transverse force dowel, complex formwork and reinforcing operations in the area of expansion joints can be avoided. In addition, visually appealing slab undersides are achieved. The structure of the Egcodorn transverse force dowel allows for the transmission of high transverse forces even with minimum component dimensions. The unique corrosion protection system and the use of high-quality materials guarantee high durability.

Egcodorn® DQ

Egcodorn® DQ allows for longitudinal and lateral movement for high loads. The Egcodorn® DQ is suitable for use in environments subject to high corrosion, with a stainless steel sleeve and a dowel core made of high-grade steel

Pecafil® - Max Frank

From ground beams to separation panels, from box-outs to pile caps and bases, Pecafil® formwork saves you time and takes the hard work out of construction. With its 20-year track record, Pecafil® is the tried and tested solution for today's construction professionals.

The specially manufactured material is constructed from a steel mesh in a wide range of sheet and strip sizes with various wire diameters, shaped to meet your needs. Its distinctive yellow outer layer is heat-shrunk polyethylene, made from non-toxic, naturally occurring hydrocarbons. Manufactured in FRANK's 50,000m² dedicated factory, Pecafil® universal formwork is then cut and bent locally for easy distribution. The formwork is environmentally friendly, has no impact on groundwater and is both recyclable and biodegradable.

The benefits of Pecafil®:

- Saves time and costs on blinding, labour and spoil removal
- Curved or complicated foundation forms can easily be produced on-site
- No stripping, cleaning or return of the formwork
- Light enough for just one person to handle – no need for hoists, ready for rapid assembly
- Fast and easy to install – can be cut with basic tools
- Re-use your Pecafil® forms, depending on the specific site conditions and construction method - no waste
- Reduced working space requirement

*** Cutting and bending services available to suit job specific designs

Stremaform®

Stremaform® formwork elements are used as lost formwork in floor slabs, ceilings and walls. The expanded metal that is welded between the bars of a specially designed reinforcing steel mesh gives rise to a rough surface. The reinforcement can be continued without a break into the second concrete pour.

- Other sizes and shapes are available upon request
- Stremaform with Integrated metal water stops or PVC cages available upon request
- Stremaform with key joints available upon request

Stremaform® Fine vs Stremaform® Standard

Stremaform® Flat material

Stremaform® flat material is used as lost formwork for working joints in floor slabs, ceilings and walls. The expanded metal that is welded between the specially designed steel reinforcement mesh produces a rough surface that avoids the need for subsequent scabbling of the concrete surface prior to a second pour. This surface forms an indented structure with the second concrete pour so that shear forces are transmitted across the working joint just as though it were a monolithic construction (proven by tests carried out at the IBMB Brunswick).

- Optimal static bonding of the joint
- Maximizing off-site prefabrication minimizes work on the construction site and guarantees fast progress of the project
- No need for formwork removal or any other finishing work

Stremaform® Spacer – The combined spacer

Stremaform® Spacers are used to maintain the concrete cover and to seal the gap beneath the bottom layer of continuous reinforcement. The Spacers thus prevent leakage of cement paste and avoid the need for laborious cleaning and reworking. During production at our factory, the correct spacer for the cover is used and the spacing and widths of the Stremaform combs are chosen to suit the reinforcement layout. The height of Stremaform combs can also be altered to suit multiple layers of reinforcement.

- A large range of concrete covers are available
- Suitable for slabs with very heavy reinforcement

Intec® injection hose system

Intec® injection hose systems consist of an injection hose, assorted accessories and a full range of injection resins. Intec® can be used as a stand-alone seal or as secondary sealing, in combination with metal, swellable waterstops or Max FRANK waterbars to seal all construction joints.

The Intec® injection hose system has been in use for over 20 years and has proved its value on many projects:

- No additional sealing method is required with reduced construction costs and shortened construction times
- Does not clog with water or cement laitance during concreting hose
- Absolutely secure and simple installation
- Injection lengths 30 m up to segment
- Quick sealing of all horizontal and vertical concrete construction joints
- Can be used to seal small cavities
- Approved for potable water applications

Intec® Premium is the proven injection hose system for joint sealing. Its unique and patented design features allow for multiple injections with polyurethane (PUR) resins. The injection chamber can be emptied by effortless pressure flushing; no additional equipment and vacuuming are required. The hose can be installed in individual sections of up to 30 m.

Cresco® GR expanding waterstop

The hydrophilic SEBS expanding waterstop Cresco® GR is a uniquely formulated synthetic rubber based swellable waterstop. It unites the most desirable characteristics of strip applied waterstops in one product. The initial onset of expansion is delayed for up to three days of exposure to water, after which the swelling begins. Overall expansion is restricted in order to prevent concrete spalling. The Cresco® GR waterstop will maintain its shape and will not be flushed out over time.

The proprietary grooved profile improves concrete bond and enhances waterproofing performance.

It can be used for waterproofing any static concrete to concrete joint.

- Acts as a non-swellable waterstop for up to three days
- Swell-rate and overall expansion will not lead to spalls
- Swelling is reversible with retention of initial geometry
- Good resistance to acids, alkalis and most aqueous solutions

| Code | Description |
|-----------|---------------------------------|
| QUBCRESGR | Cresco GR - 22 x 6mm - 15m Roll |
| QUBMKL | Cresco Fixing Glue - 300ml |

• QUBMKL 310ml cartridge is sufficient for 8 - 10m
Resistant to weathering and UV radiation

Fradiflex® metal waterstop

Fradiflex® metal water stops are supplied with a special adhesive coating on one or both surfaces with a two-part protective film which is removed individually prior to each pour. The coating forms an excellent bond with fresh concrete to reliably seal construction joints. A range of purpose made accessories including mounting clips and an expansion joint connector are available for easy and rapid installation.

Fradiflex® is a proven accepted alternative to traditional plain metal water stops for sealing construction joints. WU guideline of the DAf-Stb (guideline for watertight concrete structures) states that the standard dimensions of uncoated metal water stops should be a minimum thickness of 1.5 mm and a minimum height of 250 mm. Fradiflex® metal water stops will perform above and beyond DAfStb guideline for watertight concrete structures requirements.

- Unmatched adhesion to fresh concrete
- Tested to resist up to 50 metres hydraulic head
- Supplied in 25 metre long rolls, which reduces the number of laps and thus saving installation time while providing additional safety
- Integrated fixing angles reduce overall installation time. Joints are formed by simply overlapping sections by 100 mm and pressing against each other, no welding required
- Safe, simple and quick joint sealing of all types of construction joints
- Also available in 2.1 m long straight pieces with mounting angels

Zemseal® Premium

Zemseal® Premium is a highly durable, flexible waterproofing membrane. The material consists of three thermally fused lamination layers. The functional side (concrete) consists of a three-dimensional, diamond shaped polypropylene grid, a sandwich layer of a adhesive laced non-woven geotextile fabric and a chemically resistant polypropylene membrane on the waterbearing side. Zemseal® is ideally suited for under slab application due to its excellent mechanical properties.

Zemseal® Standard

Zemseal® Premium is a durable, flexible waterproofing membrane. The material consists of two thermally fused lamination layers. The functional side (concrete) consists of a layer of a adhesive laced non-woven geotextile fabric with a dimpled surface top increase bonding properties and a chemically resistant polypropylene membrane on the waterbearing side.

Major characteristics:

- Enhanced dual bond technology (adhesion and mechanical bond in one)
- Lasting, reliable thermo-welded product (lamination layers are thermally fused)
- Robust and malleable material (triple lamination)
- Durable polypropylene membrane (withstands chemical attack)
- Expedient installation (2 meter wide rolls, pre-formed details)
- Highly efficient (minimal lapping required)
- Engineering Services (waterproofing concepts, training, competent support)
- Climate independent installation (application range 0 °C – 50 °C)
- Part of MAX FRANK structural waterproofing system (one stop shop)

Zemdrain® Controlled Permeability Formliner

High-quality concrete surfaces

Concrete cover (the zone between reinforcement and concrete surface) protects reinforcement against aggressive environmental elements.

Cover concrete must be as dense and as hard as possible to prevent surface degradation and the ingress of aggressive elements to the reinforcement. Bridges, for example, are exposed to these aggressive elements: oxygen, carbon dioxide, humidity, wind, sand and mineral salts.

Due to the poor quality of concrete surfaces, visible damage to the concrete can occur after only a few years. The use of Zemdrain® modifies the surface characteristics of the concrete which considerably improves all concrete properties increasing quality and durability.

Without Zemdrain®

With Zemdrain®

Smooth to slightly textured, white surface (concrete side)

- Rear side (formwork side) with special draining grid
- Roll dimensions: Width 2.5 m and length 35 m
- Very economic because of the possibility of repeated use (2 – 3 times), simple and quick assembly
- High water storage capacity, therefore also suited for inclined or horizontal surfaces

More than 20 years of experience with Zemdrain®

Zemdrain® controlled permeability formliners have been used for many years in thousands of projects worldwide. In the Gulf region, for example, maximum durability and low maintenance costs under extreme environmental influences are of paramount importance. Very high levels of airborne salts, excessive air humidity and regular sandstorms are extreme challenges for any concrete structure. To ensure the highest quality concrete surfaces and maximum durability resistance, the use of Zemdrain® is highly recommended. Concrete structures must fulfill extremely high quality requirements not only in the Gulf region, but also in other hazardous environments like wastewater treatment plants. Zemdrain® is widely used for improving surfaces of these structures. Concrete must be resistant against hydro abrasion and sufficiently protected against the attacks of chemicals, acid and water. Only a high-quality surface concrete zone prevents premature degradation by abrasion or frost and thus increases the maintenance free life of these structures.

As surfaces are uncontaminated by release agent residues, microbiological growth is also minimised and surfaces are easy to clean.

Applications of Zemdrain®

Zemdrain® of all types consists of a filter layer consisting of polypropylene fibres with a highly controlled pore structure that ensures retention of cement and fine aggregate but is permeable to water and air. Adhesion of the filter to the concrete is minimal. The rear of the liner is a drainage layer consisting of either polypropylene fibres or a special grid.

Zemdrain® is widely used for various applications:

- Drinking Water Structures
- Wastewater & Sewage Treatment Plants
- Marine & Waterways Structures
- Dams & Power Stations
- Transport Infrastructure
- Exposed concrete

| Code | Description |
|----------|--------------------------|
| ZEMFRASA | Zemdrain® MD - 2.5 x 35m |

A low water/cement ratio, reduced to match the hydration requirements in the concrete surface next to the formwork and a compact concrete structure make the surface concrete dense and hard. Additionally Zemdrain® retains part of the water, which is transported back to the concrete surface during the early age hardening phase (curing of green concrete).

Significantly increased surface hardness and abrasion resistance.

Reduced surface porosity minimises chloride ingress.

The dense surface with a reduced water/cement ratio significantly reduces the rate of carbonation.

The uncontaminated, virtually blowhole and blemish free surfaces reduce the potential for the growth of micro organisms. Drinking water reservoirs made from concrete without the use of release agents guarantees hygienic drinking water.

The increased cement content at the surface, together with early-age curing help reduce surface permeability and reduce water absorption.

The percentage of blowholes and pores is not only reduced on the concrete surface, but also immediately below. This provides additional safety for applications in drinking water reservoirs or for the use of coatings.

The dense surface concrete gives increased freeze/thaw resistance.

Principles of use

1. Zemdrain® is fixed to the formwork before erection (see separate Installation Guideline).
2. Once the formwork is erected, concrete is placed and compacted in accordance with normal practice.
3. Zemdrain® retains the concrete fines whilst allowing the controlled drainage of excess air and water that is normally trapped at the concrete/formwork interface. Additionally, water retained within the formwork side of the formliner is given back to the concrete during the curing phase (early age curing of green concrete).
4. After removal of the formwork, the very dense, hard, virtually blowhole free surface uncontaminated by release agents produced with Zemdrain® is immediately visible.
5. Use of Zemdrain® optimises the surface water/cement ratio, minimises blowholes and improves early age curing to give a high quality durable concrete surface with optimum resistance to all forms of environmental attack.

SiteVibe - Concrete Vibrator

- Genuine Honda GX35
- High vibrating power
- Long working life
- Shoulder harness & Padded Hip Protector
- Wear resistance and reliability
- Easy operation
- Easy maintenance
- Weight - 12kg

| Code | Head Dims | Engine |
|--------|-----------|---------------------------------------|
| BNMV44 | 44 x 360 | Honda GX35 @ 1.2kW 4 Stroke Petrol |

Super Screed

Light yet robust and easy to handle; therefore, maneuvering is simple. The equipment guarantee maximum reliability and high productivity. The result will be a perfectly leveled, flat floors regardless of how small or big the surfaces are.

Peak - Blue Extra Grease

Extreme pressure lithium complex grease - NLGI 2

PEAK BLUE EXTRA GREASE is a premium, multipurpose high temperature lithium complex NLGI No. 2 grease, designed to meet the demands of the most hostile grease applications and conditions. It is recommended for use in most types of automotive, agricultural and industrial applications including heavy-duty service. PEAK Blue Extra Grease is particularly suitable for use in steel mills, underground tunnelling, mining and ore crushing plants, automotive wheel bearings, rolling element bearings, plain bearings, chassis parts, gears and couplings

| Code | Litres | Description |
|--------------|--------|------------------------|
| SC-PKGXBE450 | 450ml | Blue Extra EP2 Grease |
| SC-PKGXBE020 | 20Kg | Blue Extra EP2 Grease |
| GREASEGUN | 450g | Pistol Type Grease Gun |

Peak - Grease and Anti Seize

PEAK ULTRA PLANT GREASE is recommended for anti-friction and plain bearings, gears and couplings in automotive, marine, agricultural and industrial applications requiring grease with a high base oil viscosity and weld load. It is particularly suitable for use in extreme heavy-duty applications and where high thermal resistance is vital. These applications include all industrial, earthmoving, agricultural, automotive and marine equipment.

PEAK ANTI-SEIZE COMPOUND is a premium, anti-seize Copper/Graphite grease designed to provide protection against corrosion and metal-to-metal contact in a wide range of automotive, marine, industrial, workshop and domestic applications, particularly where very high temperatures are encountered.

Manufacturers Since 1858

With its range of more than 1500 professional tools, Pavan "Ancora" brand stands out for quality, experience and innovation to satisfy the most demanding professionals.

The excellence of Pavan "Ancora" brand is the result of a scrupulous choice of materials, innovative production technology and constant manufacturing process control. This is why Pavan is known all over the World as the perfect combination of respect for traditions, modern production processes and total consumer satisfaction.

The whole range of "Ancora" brand products is entirely designed, produced and tested in the company factory in Arcade, near Treviso, in northern Italy, so as to certify the excellent quality level of the total made in Italy Pavan products.

This image shows a full page of handwriting practice paper. It features multiple rows of horizontal guidelines. Each row consists of three lines: a solid top line, a dashed middle line, and a solid bottom line. The paper has rounded corners at the top and bottom edges. There are no markings or text on the page other than the printed lines.

Marshalltown Brick Trowels

- Forged from a single piece of high carbon steel then heat treated for strength and durability
- Blade is taper ground and polished
